

DETAIL A

HOOK SLOT, 4 PLACES

SCALE 1:1

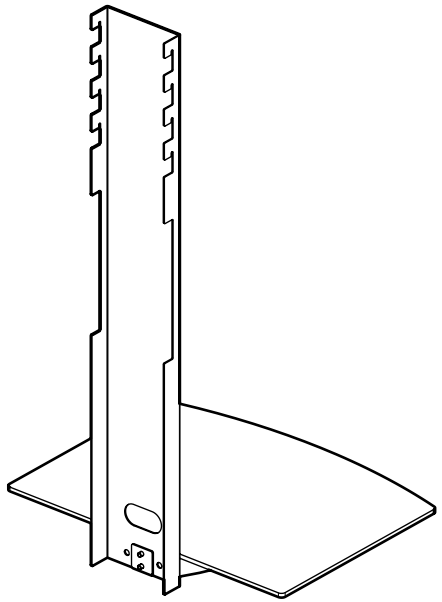

FRONT VIEW

RIGHT SIDE VIEW

NOTES

1. Shown assembled, off the mount. The backbone hooks over the top edge of the mount's horizontal TV plate, behind the TV, and is held by its own weight; it needs no fasteners.
2. Fits a mount whose horizontal TV plate is 8-7/8 to 9-3/8 in tall. The top edge of the plate goes into the .125 wide upper end of one hook slot in each flange (Detail A).
3. Four hook slots, 1.600 apart, set the shelf height: 14.5 to 19.5 in below the center of the screen. Top of the hook slot to the top of the glass: 19.235, 20.835, 22.435, 24.035 (lowest slot to highest).
4. The backbone hangs between the TV rails: the mounting-hole pattern on the back of the TV must be wider than 150 mm.
5. Glass shelf: black glass, .200 (5 mm) thick, with a curved front edge. Metal parts: black powder coat finish.
6. Hardware shown: three M5 x 10 flat head screws, one down through the glass (rubber washer under its head) and two through the V bracket and the backbone into the backing plate. A 3 mm hex wrench is included.
